

Hongqi E-HS9 Pure Electric SUV 660 Kilometers Range 4 Seats 4×4 Automatic Transmission

Our Product Introduction

for more products please visit us on vehicle-automobile.com

Basic Information

- Place of Origin: China
- Brand Name: Hongqi
- Model Number: Hongqi e-HS9 pure electric SUV has a range of 660 kilometers, 4 seats, 4×4 automatic transmission
- Minimum Order Quantity: 1 vehicle
- Price: \$100,000-\$110,000Dollar
- Packaging Details: Complete vehicle
- Delivery Time: 5-8 work days
- Payment Terms: T/T
- Supply Ability: 1000 vehicle

Product Specification

- Highlight: E-HS9 Pure Electric SUV, 660Km Range Pure Electric SUV, 4Seats 4X4 Electric SUV

Product Description

Hongqi E-HS9 Pure Electric SUV Has A Range Of 660 Kilometers, 4 Seats, 4×4 Automatic Transmission

Sure! Here's a segmented description of an electric off-road vehicle, organized clearly:

Vehicle Type and Purpose: An electric off-road vehicle is a specialized vehicle designed for off-road driving. It is powered by an electric propulsion system, eliminating the need for a traditional internal combustion engine and offering zero emissions and environmental friendliness. Electric off-road vehicles are commonly used for off-road exploration, outdoor sports, and nature conservation, providing a quiet, efficient, and eco-friendly driving experience.

Body Design and Off-Road Performance: Electric off-road vehicles typically have a high ground clearance and optimized off-road geometry in their body design to navigate various challenging terrains and road conditions. They may be equipped with reinforced chassis protection plates and impact-resistant design to provide better off-road protection and durability. Electric off-road vehicles may also employ special tires and suspension systems to enhance traction and maneuverability on uneven surfaces.

Electric Propulsion System and Range Capacity: Electric off-road vehicles utilize an electric propulsion system typically comprised of a battery pack and electric motor. The battery pack stores electrical energy to power the electric motor that drives the vehicle. The range capacity of electric off-road vehicles may vary across different models and is usually determined by factors such as battery capacity, electric motor efficiency, and driving conditions. Certain models of electric off-road vehicles may also feature fast-charging technology for improved charging efficiency and convenience.

Interior Design and Intelligent Features: The interior design of electric off-road vehicles often focuses on driver and passenger comfort and convenience. They may offer spacious seating and a user-friendly layout for enhanced comfort during rides. Electric off-road vehicles may also come equipped with intelligent features such as touchscreen infotainment systems, navigation systems, voice control, and in-car connectivity, providing a convenient driving experience and a connected cabin environment.

Safety and Driver Assistance Features: Electric off-road vehicles prioritize safety performance and driver assistance features. They may be equipped with multiple safety airbags, stability control systems, brake assist systems, and other active and passive safety features to provide comprehensive on-road protection. Electric off-road vehicles may also feature driver

Our Product Introduction

assistance functions such as adaptive cruise control, lane-keeping assist, and blind-spot monitoring, offering advanced levels of driving assistance and safety.

Through the above segmented description, we can clearly understand the type and purpose of an electric off-road vehicle, its body design and off-road performance, electric propulsion system and range capacity, interior design and intelligent features, as well as safety and driver assistance features. These descriptions help us comprehend the characteristics of an electric off-road vehicle in terms of off-road driving and the eco-friendly, efficient, and intelligent driving experience it provides to users.

Vehicle technical parameters		
1	Car body dimensions (length × width × height) mm:	5209×2010×1713
2	Motor manufacturer	China FAW Group Co., Ltd.
3	Wheelbase mm:	3110
4	Vehicle fully loaded total mass kg:	3090
5	Vehicle curb weight kg:	2640
6	suspension system	Front double wishbone independent suspension, rear multi-link independent suspension
7	Approach / departure angle	21.3/21.4
8	Front overhang/rear overhang mm	916/1183(mm)
9	Axle load	1369/1820
10	Number of axes	2
11	Fuel consumption	10.3
12	NEDC pure electric cruising range	660km
13	Number of tires	4
14	Front wheelbase/rear wheelbase	1708/1709
15	Steering Type	steering wheel
16	Minimum ground clearance mm:	150
17	Battery Type	Ternary lithium battery
18	Fuel type:	pure electricity
19	Battery energy:	120kWh
20	engine model	Dual motor
21	Motor type	Permanent magnet/synchronous
22	Total motor torque	750(N.m)
23	Motor rated power kw:	405
24	Maximum torque Nm/rpm:	750
25	Emission Standards:	National VI
26	Drive mode	Electric four-wheel drive
26	transmission:	automatic transmission
28	Top speed km/h:	200
29	Tire specifications and models	275/40R22
30	Braking System	front disk rear disk
31	Environmental protection standards	pure electric
32	Rated passenger capacity (including driver)	4 people
Main vehicle configuration		
33	All-metal enclosed load-bearing body, exterior colors are white, silver, gray, and black	
34	ABS8.0+EBD, EBA/EBS/BA, ASR/TCS/TRC, ESC/ESP/DSC	
35	Electric rearview mirror	
36	LED headlight	
37	Multiple driving modes: sport, economy, standard, comfort, snow	
38	front air conditioner	
39	central locking	
40	Visual reversing	
41	aluminum alloy wheels,	
42	Full vehicle electric doors and windows	
43	Driver's seat (main) airbag, front side airbags, front and rear head airbags	
44	remote key	
45	16.2-inch touch LCD screen	
46	16 speakers	
47	Body metallic paint	
48	high mount brake light	
49	Cab multifunctional storage box	
50	Full car seat belt	
51	Adjustable seat back	
52	Electronic parking	
53	Reversing image/360 panoramic image	
54	Simple backup tool
